

Partnership for the Bay's Future Alumni Supports

The Partnership for the Bay's Future's grant programs advance policy and systems change that protect tenants and improve housing affordability. We understand that this work takes time and that our grantees may have important milestones expected after their grant period ends. The Partnership is pleased to continue supporting our partners who are now alumni of our Challenge Grant program. The various ways we can support our alumni are listed below.

Continued supports

1. **Lobbying.** Upon request, Partnership staff may support your Challenge Grant policy package through lobbying efforts such as providing public testimony or writing a letter of support. You can explore our lobbying support process [here](#).
2. **Communications support.** The Partnership can advise your team in developing communications ideas and strategies, copyediting, and publishing or promoting content on our platforms. Our Communications Support Guide can be found [here](#). We can offer all listed supports for continued Challenge Grant work except for technical assistance funding. To access these supports, contact jshapiro@sff.org.
3. **Continued Partnership affiliation.** If it helps advance your Challenge Grant policy package, your team should feel free to refer to the support provided by the Partnership, including referring to team members as alumni of the Partnership for the Bay's Future.
4. **Updates from the cohort and Partnership.** We will be reducing the cadence of the newsletter and will use the space to keep the cohort updated on each other's policy milestones, Partnership highlights, and useful opportunities and resources. Let us know what you'd like to see in the newsletter by emailing echavez@sff.org.
5. **Convenings and connection to the Partnership network.** Your teams will continue to receive invitations to Partnership convenings and alumni events. Additionally we may be able to leverage our network to help advance your policy goals.

Future supports: coming soon

1. **Alumni sections of the Partnership website.** We are working to update the Partnership's website, which will include an external page highlighting the cohort's work and an alumni portal where you all can share resources.
2. **Engagement opportunities with new cohorts.** Collaboration is a core principle of the Partnership's grant programs. We will create continued opportunities for connection and collaboration between cohorts.

Is there something you'd like to see not listed here? Please contact echavez@sff.org.
